

Perspective Enterprise BI Portal

Benefits

The Enterprise BI Portal is a central hub for business staff to find and collaborate on all of the scorecards, dashboards, and reports within the enterprise.

Find exactly what you are looking for from a single location

Reduce the volume of irrelevant reports for staff

Enable a governed and managed catalogue of business terms

Bring together reports from on premise or in the cloud

A central report catalogue which enables unmatched ease of discovery for business users.

Faced with a myriad of reporting tools, high volume of reports, and an escalating list of sources and locations, it can be very difficult to not only find what you are looking for, but also ensure the right information is available to the right audience.

Enable Business Discovery

Enterprise BI Portal

Use Perspective Enterprise BI Portal to bring together all of your dashboards, scorecards and reports within your enterprise, in a single location.

Perspective Enterprise BI Portal:

- **Allows you to register**, tag and audience target reports in seconds using a simple wizard driven interface.
- **Provides staff the ability** to search by business terms they are familiar with, dramatically reducing the time that it takes to find the answer to a particular business question.
- **Adopts a user friendly**, highly configurable tile layout, which ensures the most critical information is presented to staff first.
- **Captures commentary directly** against individual reports so that team members can collaborate and communicate in the one place. Without relying on emails.
- **Publishes reports from multiple platforms**, including Power BI, Datasen, SQL Server Reporting Services, and any other web URL.

What is Perspective Enterprise BI Portal?

A single, web-based central catalogue of reports, Perspective Enterprise BI Portal is a unique publishing and tagging framework to ensure all of your reports are discoverable in a governed manner. Pivoting around a global report catalogue, staff can publish reports and target to specific users or groups in seconds. This ensures that only the information that is needed is presented to the right teams, reducing the noise of irrelevant reports and allowing people to quickly focus on the most important information to their role.

With a completely configurable taxonomy, the Enterprise BI Portal allows you to manage metadata to suit your specific business, in turn allowing tagged reports to be audience targeted to specific roles within the organisation.

What is included in Perspective Enterprise BI Portal?

Perspective Enterprise BI Portal provides a single, web based reporting hub to provide lots of reports to lots of users.

Ease of Discovery

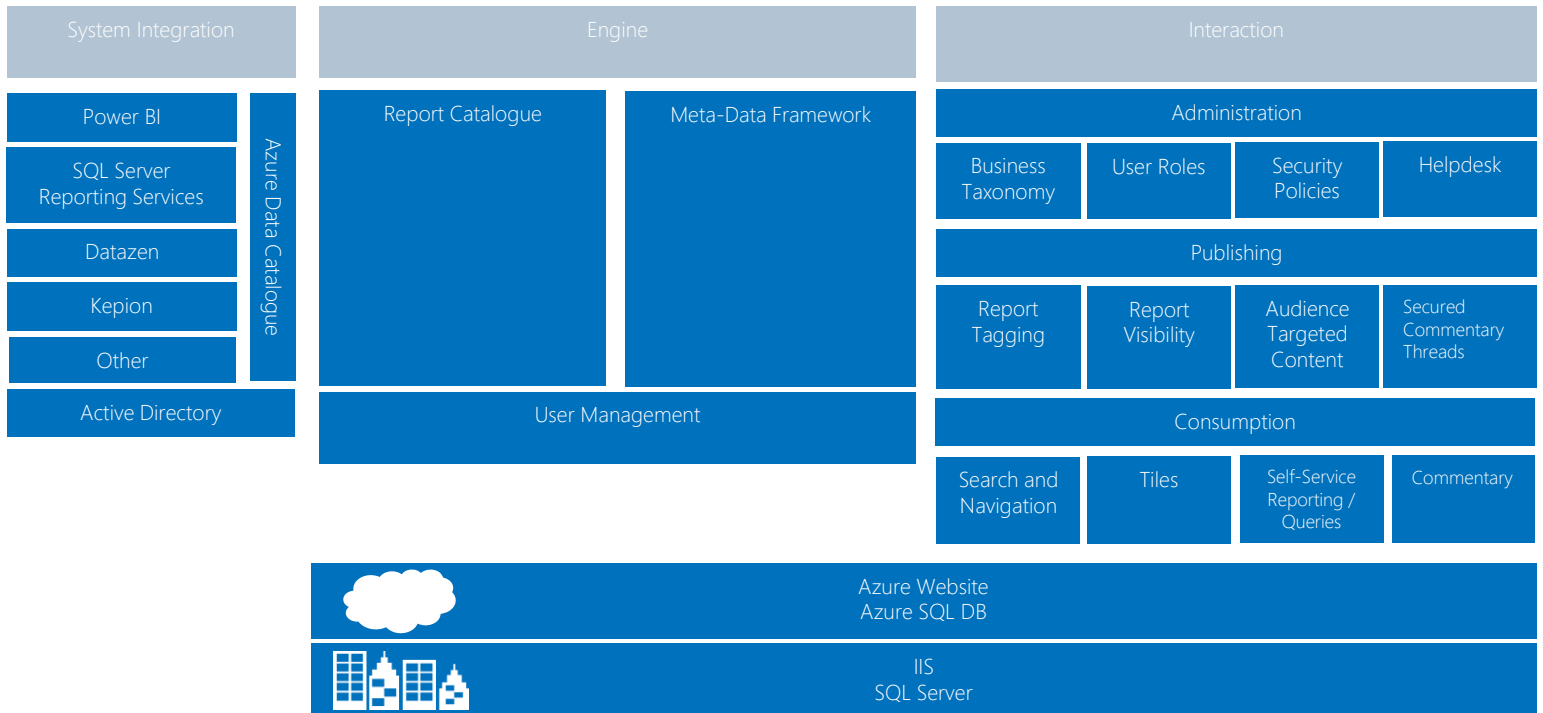

A central report catalogue, and guided navigation provide you the ability to very quickly find the right report you are looking for.

Governance

Fully integrated with Active Directory, the Portal allows you to propagate your security to all published reports, commentary and access levels.

Integration

Publish reports from practically anywhere including Power BI, Reporting Services, and any web based report including Tableau, SAP Business Objects, Cognos and more.

The Key to Enterprise BI Portal
